DETAILED ACTION

Response to Amendment

Claims 1, 3-9, and 13-41 are in the case.

Claims 2, 10-12, and 42-44 have been withdrawn from consideration.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1, 3-9, and 13-41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schechter (5,456,222) in view of Manka et al (5,834,407).

Schechter teaches a method for operating a camless internal combustion engine. Manka et al teach a low-phosphorus or phosphorus-free lubricating oil composition for an engine containing an extreme-pressure additive comprised of metal and phosphorus, provided the amount of phosphorus contributed to the low-phosphorus or phosphorus-free lubricating oil composition by the extreme-pressure additive does not exceed about 0.08% by weight based on the weight of the low-phosphorus or phosphorus-free lubricating oil composition (See col. 10, 15 and 28). It would have been an obvious matter of design choice to use the low-phosphorus lubricating oil composition on the

Art Unit: 3747

camless engine to reduce wear and exhaust gas emissions because of the low amount of phosphorus.

Response to Arguments

2. Applicant's arguments filed on October 16, 2003 have been fully considered but they are not persuasive.

3. In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, it would have been obvious to one having ordinary skill in the art at the time the invention was made to employ the low-phosphorus lubricating oil composition in the electro-hydraulic actuator of a camless engine in order to reduce wear, noise and emissions because the low-phosphorus amount in the lubricating oil composition.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3747

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
